

COSOSYS RELEASES FIRST FULLY COMPATIBLE DEVICE CONTROL SOLUTION FOR WINDOWS 7 AND MAC OS X

by Phil Leggiere

Thursday, 15 October 2009

CoSoSys, San Jose, Calif., a developer of endpoint security and portable storage device applications, has announced a new version of Endpoint Protector 2009, the first Device Control solution, which is fully compatible with the new Windows 7 operating system and the latest Mac OS X version, Snow Leopard.

Endpoint Protector 2009 is designed to minimize internal threats, reduce data leakage risks and control devices connected at endpoints, allowing IT departments to proactively take control of the devices' internal use, while tracking all data transferred in or out of the protected network and enforcing encryption of data in transit on portable devices.
