CoSoSys Develops Strategic Distribution Partnership for South Korea with LG N-Sys | Virtual-Strategy Magazine

CoSoSys has partnered with LG N-Sys, the leading software and hardware distributor in South Korea to distribute its Endpoint Protector Solutions for Data Loss Prevention.

Cluj-Napoca, Romania, November 24, 2012 --(PR.com)-- CoSoSys, Developer of Data Loss Prevention (DLP), Device Control, Mobile Device Management and Portable Storage Encryption Solutions announces today that it has signed a strategic distribution partnership agreement with LG N-Sys, leader distributor of IT infrastructure solutions in South Korea. LG N-Sys will distribute the complete range of CoSoSys' Endpoint Protector Solutions.

Data is usually one of a company's most vital assets. To protect it, as the adoption of portable and mobile device use and cloud/web based services increases, is becoming more and more difficult. Its integrity and safety is threatened. With Endpoint Protector, companies can control portable and mobile device use along with monitoring of easily accessible ports, like USB and control file transfers in and out of the network, preventing data leakage, data loss and data theft on a wide range of Operating Systems. Endpoint Protector supports Device Control for Windows, Mac OS X and Linux, Content Aware Data Loss Prevention for Windows and Mobile Device Management for iOS and Android. It can be easily integrated as Endpoint Protector is available as Virtual or Hardware Appliance. LG N-Sys is introducing the advantages of Endpoint Protector on the South Korea market and has seven resellers of CoSoSys' Endpoint Protector Solutions so far.

"We are happy that LG N-Sys is bringing our Endpoint Protector 4 range of products to the South Korea market. We value and respect this partnership as it opens a new market for us and LG N-Sys is a great and respected name in the region's IT sector," said Roman Foeckl, CoSoSys CEO.

For more details about Endpoint Protector and CoSoSys' partners worldwide please visit: http://www.endpointprotector.com/.

About CoSoSys CoSoSys is specialized in network device control, endpoint security, data loss prevention (DLP) for Windows / Mac and Mobile Device Management for iOS and Android devices. The application portfolio includes functions from device control, file tracing and shadowing, password security, data synchronization and network security. CoSoSys distributes its products globally through Distributors, Resellers and directly to users at http://www.EndpointProtector.com. CoSoSys is an independent software developer since a management buyout from Astaro in July 2011. CoSoSys enjoys a continuously growing installation base of users worldwide and was recognized in 2011 as one of the fastest growing technology companies being a winner of the 2011 Deloitte Technology FAST 50 ranking for Central Europe. The company has offices in Germany, the United States and Romania.
