Our award-winning solutions are easy to use, innovative and trusted around the globe by millions

CoSoSys is a leading developer of endpoint centric Data Loss Prevention (DLP) solutions and security software. Our mission is to enable small and medium sized businesses and end users around the world to take full advantage of the performance benefits of mobility, portability, and communications solutions, without compromising security.

Our flagship product, Endpoint Protector, is an advanced all-in-one DLP solution for Windows, macOS, and Linux as well as Thin Clients, that puts an end to unintentional data leaks, protects from malicious data theft and offers seamless control of portable storage devices. Its content filtering capabilities for both data at rest and in motion, range from predefined content based on dictionaries, regular expressions to profiles for data protection regulations such as GDPR, HIPAA etc.

Endpoint Protector is certified with Common Criteria EAL2, was Highly Commended for DLP at the SC Awards Europe 2018 and won in the Data Leakage Prevention (DLP) category at the 2018, 2017 and 2016 Cybersecurity Excellence Awards. It was also recognized in the 2017 Gartner Magic Quadrant for Enterprise Data Loss Prevention and by the Radicati Group in the Enterprise Data Loss Prevention Market Quadrant 2017.

Continuously evolving to address the information security sector's most pressing needs, CoSoSys recently launched sensitivity.io, DLP SDKs for cloud, apps and services which aim to enable developers to easily add security and compliance features to their products.

Our products grow based on three principles: innovation, client feedback and market evolution. Innovation is at the heart of everything CoSoSys does: we encourage pro-activity in our team of highly-skilled developers which constantly tests creative ideas and adds exciting new features to our solutions.

We believe in putting our clients' needs first: many of the improvements to our products are a direct consequence of feedback sessions with clients. Our solutions continually evolve to deal with real world conditions and to ensure that compliance is met with new legislative changes.

CoSoSys' products proudly protect over 11.5 million users worldwide and are represented by more than 130 partners in over 90 countries. We were recognized in 2011 as one of the fastest growing technology companies in Central Europe in the Deloitte Technology FAST 50 ranking and have offices in Germany, the United States, South Korea and Romania.

Offices: Friedrichshafen (Germany), Raleigh, North Carolina (United States), Seoul (South Korea) and Cluj-Napoca (HQ, Romania)

Founded: 2004

Number of employees: 50-99

Number of customers: 11.5 million

Distribution channel: 130 partners in 90 countries

Our Technology

CoSoSys' approach to technology is human-centric. Our tremendous growth is due both to the dedication of our security specialists and our focus on the creation of products which are powerful and effective, but at the same time user-friendly and easy to implement.

We strive to have our products up and running in hours and to provide an intuitive centralized web interface that can be used by any IT administrator. We also try to ensure that our solutions have a minimum impact on employees' productivity in their day-to-day tasks.

Endpoint Protector, provides Data Loss Prevention (DLP) not just for Windows, but also macOS and Linux, making it the go-to solution for companies running multi-OS networks. We are pioneers in the implementation of DLP for macOS and Linux, covering Mac OS X 10.4+ and several Linux distributions – Ubuntu, openSUSE, RedHat and more. Our product also offers diverse implementation formats to meet the needs of all organizational infrastructures: as a Virtual Appliance compatible with the most popular virtualization tools, as an easy to use Hardware Appliance preinstalled with a variety of models based on clients' needs or as instances for AWS, Google Cloud or Microsoft Azure.

Endpoint Protector features five specialized modules which clients can pick and choose from based on their needs:

Content Aware Protection allows companies to decide which sensitive data can leave computers by creating policies based on predefined content or compliance regulations such as GDPR or HIPAA. It also logs and reports transfers of important documents.

Device Control is the most granular solution of its kind on the market, allowing administrators to block or limit the use of portable storage devices based on criteria such as device type or serial number as well as based on time or network policies.

Enforced Encryption automatically encrypts any USB devices connected to network endpoints, ensuring data can only be saved on encrypted devices.

eDiscovery offers the possibility to scan sensitive data at rest stored on employees' endpoints based on specific file types, predefined content, Regular Expressions, GDPR or HIPAA protected content and more. Based on the scan results, remediation actions can be taken such as encrypting or deleting data.

Our DLP solution offers a short learning curve and can be managed even by non-specialized personnel so there is no need for companies to spend money on extra training, helping to reduce the cost and hassle of transitioning to a more secure work environment.

Key Facts

April 2004 – Founded

July 2004 – Release first application - Lock it Easy that secures data on USB Flash Drives

December 2004 – Release second application - Surf it Easy Enables private/safe internet browsing on the road for users of USB Flash Drives

March 2005 – Release third application Carry it Easy Syncs data between two PCs using a USB Flash Drive or external HDD

April 2005 – CoSoSys reaches breakeven point

March 2006 – Release of Carry it Easy +Plus Sync data and Outlook between two PCs using a portable storage device

January 2007 – Nominated for “CODiE Software Newcomer of the Year 2007” Awards by the Software & Information Industry Association (SIIA)

February 2007 – Release of Secure it Easy – USB Firewall first commercial standalone PC Device Control and Endpoint Security Software for Windows Vista

April 2007 – Carry it Easy +Plus wins PC Pro Recommendation Award for Favorite Synchronization Software [show award in timeline]

April 2007 – Release of Carry it Easy +Plus Bio for Biometric portable storage devices (biometric authentication and data sync)

October 2008 – CoSoSys named Finalist for 2008 Hot Companies Awards by Info Security Products Guide

February 2008 – Release of Endpoint Protector 2008, first enterprise class Endpoint Security solution that manages Wireless USB devices and all other types of removable and portable storage devices

June 2008 – Release of Endpoint Protector with enforced encryption on removable storage devices

November 2008 – Endpoint Protector 2008 server is ported on several Linux distributions, expanding its availability for Linux systems

December 2008 – CoSoSys is nominated as finalist at the 2009 Hot Companies Awards by Network Products Guide

March 2009 – Endpoint Protector 2009 with unique File Whitelisting features is launched, focusing on improved protection against data loss

June 2009 – CoSoSys introduces My Endpoint Protector, the first cloud-based protection against threats posed by portable devices

July 2009 – Launch of first centrally manageable device control solution for Mac OS X

July 2009 – CoSoSys included in CRN's Top 25 Coolest Emerging Vendors of 2009

August 2009 – CoSoSys releases EasyLock, an enterprise grade portable data encryption solution (256bit AES Encryption) for USB Devices

March 2010 – License to Hope campaign launched by CoSoSys to support the Foundation for Children, Community and Family

May 2010 – My Endpoint Protector launched in Japan

June 2010 – CoSoSys SaaS offering, My Endpoint Protector for device control, is now available for home users FREE of charge

July 2010 – CoSoSys was selected as a 2010 Emerging Security Technology Vendor by CRN Magazine <http://www.crn.com/slide-shows/security/225700493/2010-emerging-security-vendors.htm?pgno=9>

October 2010 – Endpoint Protector Hardware Appliance is launched. The world's first hardware appliance for device control and endpoint security

November 2010 – The free tool AutoRun Disable is released to protect computers and networks against USB-spreading Malware

November 2010 – Endpoint Protector Basic, the desktop application for Device Control and Data Loss Prevention is launched replacing Secure it Easy

January 2011 – Endpoint Protector Hardware Appliance was selected Finalist in Info Security Products Guide's Global Excellence Awards, under the Endpoint Security category

January 2011 – CoSoSys is acquired by Astaro the global leading unified thread management developer

June 2011 – Astaro is being acquired by Sophos the global leader for endpoint security solutions with over 100 million users

July 2011 – Management Buyout by Roman Foeckl CoSoSys Founder and Michael Bauner from Astaro / Sophos to become again an Independent Software Vendor

October 2011 – CoSoSys is a winner of the annual 2011 Technology FAST 50 ranking by Deloitte. Being part of the ranking recognizes CoSoSys as one of the fastest growing technology firms in Central Europe

November 2011 – Endpoint Protector 4 released

January 2012 – CoSoSys was selected Finalist in Info Security Products Guide's Global Excellence Awards for its Endpoint Security and Encryption Solutions, Endpoint Protector Appliance, respectively, EasyLock.

March 2012 – Virtual Appliance of Endpoint Protector 4 released

May 2012 – Content Aware Protection for Endpoint Protector 4 released for content sensitive Data Loss Prevention

November 2012 – Mobile Device Management for Endpoint Protector 4 released for iOS and Android smartphones and tablets

December 2012 – Endpoint Protector 4 wins SUPERSTAR Award in the category Enterprise Solutions: Security and Shining Star Award in the category Enterprise Solutions: Mobile Device Management in the 11th Annual Mobile Star Awards, organized by MobileVillage

January 2013 – Endpoint Protector 4 adds support for Thunderbolt and USB 3.0 ports against data loss through storage devices

March 2013 – CoSoSys becomes a member of the Trusted Computing Group (TCG)

April 2013 – Endpoint Protector won the Highly Commended Award in the Best DLP category at SC Magazine Awards Europe 2013

May 2013 – Endpoint Protector 4.3 incorporates Mobile Application Management for iOS mobile devices as a new feature

June 2013 – Endpoint Protector 4.4 completes its Data Loss Prevention solution for Mac OS X with the release of Content Aware Protection for Mac OS X

July 2013 – CoSoSys raises awareness and smiles with the release of a new comic series on Mobile Device Management and Data Loss Prevention

October 2013 – The cloud-based Content Aware Protection module is integrated into My Endpoint Protector.

October 2013 – Support for iOS 7 is added and upcoming features for Mobile Device Management iBeacon Security are announced. The cloud-based Mobile Device Management module is integrated into My Endpoint Protector

December 2013 – Endpoint Protector won the Rising Star Award in the category Mobile Device Management in the 2013 Mobile Star Awards

March 2014 – CoSoSys Launches Industry's First Enforced Encryption Tool on Removable Storage Devices for Mac OS

Fax +40-264-593113
Web www.endpointprotector.com

April 2014 – CoSoSys Releases Endpoint Protector Version 4.4.0.3, adding Regular Expressions filters, Mac OS X enrollment in the MDM module, Mobile Application Management for Android and other improvements

September 2014 – CoSoSys releases Endpoint Protector Version 4.4.0.4, providing enhanced Data Loss Prevention functionalities, like the Threshold for the Predefined Content Filter, compatibility with Mac OS X Yosemite, Geofencing for location-based Mobile Device Management policies and other innovative features

October 2014 – Endpoint Protector 4 wins 2014 Computing Security 'DLP Solution of the Year' Award

October 2014 – Endpoint Protector 4 receives Common Criteria EAL2 Certification by ITSCC

December 2014 – CoSoSys enhances Data Loss Prevention features for HIPAA compliance and introduces DLP for printers with Endpoint Protector version 4.4.0.6

March 2015 – CoSoSys releases Endpoint Protector Version 4.4.0.7, providing additional features to both its Device Control and Content Aware Protection modules, as well as the option of exporting Logs, File Shadows and System Backups to sources external to the appliance

April 2015 – Endpoint Protector 4 named Gold Winner at Info Security PG's Global Excellence Awards

June 2015 – CoSoSys releases Endpoint Protector Version 4.4.0.8, extending the Data Loss Prevention functionalities to include support for both Thin Client Storage Rights and transfers that occur on Windows Terminal Servers to and from Thin Client Drives

September 2015 – My Endpoint Protector is updated to version 4.4.0.8, a major release that brings a long list of features to the cloud-based Data Loss Prevention and Mobile Device Management solution

October 2015 – Endpoint Protector 4 wins the DLP Solution of the Year Award for the second year in a row at Computing Security Awards 2015

November 2015 – Endpoint Protector is nominated for the TeleTrusT Innovation Award 2015

January 2016 – Endpoint Protector becomes member of the Linux Foundation

February 2016 – Endpoint Protector 4 is Gold Winner for the second year in a row at Info Security PG's Global Excellence Awards 2016

March 2016 – CoSoSys introduces Endpoint Protector Data Loss Prevention for Linux (Ubuntu, RedHat, OpenSUSE, and other distributions)

April 2016 – Endpoint Protector wins the Cybersecurity Excellence Awards in the Data Leakage Prevention (DLP) category

May 2016 – CoSoSys moves to new headquarters to accommodate growth

June 2016 – CoSoSys adds managed enforced encryption with deeper EasyLock integration with Endpoint Protector to remotely manage and enforce USB encryption for Windows and Mac OS X

February 2017 – CoSoSys recognized in the 2017 Gartner Magic Quadrant for Enterprise Data Loss Prevention

February 2017 – Endpoint Protector 4 is Winner for the second year in a row in the Data Leakage Prevention category at the 2017 Cybersecurity Excellence Awards

May 2017 – Endpoint Protector 5 is released with a redesigned, responsive, refined interface and updated eDiscovery module

October 2017 – CoSoSys recognized by the Radicati Group in the Enterprise Data Loss Prevention Market Quadrant 2017

November 2017 – Endpoint Protector 5 receives its Common Criteria EAL2 Recertification from KOSYAS

January 2018 – CoSoSys releases Endpoint Protector 5.1.0.0 which brings, among other features, time and network-based Device Control policies, extended Offline Temporary Password, and automatic eDiscovery scans

February 2018 – Endpoint Protector is Winner for the third year in a row in the Data Leakage Prevention category at the 2018 Cybersecurity Excellence Awards

June 2018 – Endpoint Protector is named Highly Commended in the Best Data Leakage Prevention (DLP) Solution category at the SC Awards Europe 2018

September 2018 – CoSoSys releases Endpoint Protector 5.2.0.0 which brings a new layer of Contextual Detection, Source Code detection, EasyLock redesign and fresh new features like File Shadow Repository

October 2018 – CoSoSys is recognized by the Radicati Group in the Enterprise Data Loss Prevention Market Quadrant 2018

January 2019 – CoSoSys is mentioned in the Forrester Now Tech: Data Loss Prevention, Q1 2019

February 2019 – CoSoSys is Winner in the Database Security, Data Leakage-Protection/Extrusion Prevention category at the 2019 Infosecurity PG`s Global Excellence Awards

February 2019 – CoSoSys is Winner for the fourth year in a row in the Data leakage Prevention category at the 2019 Cybersecurity Excellence Awards

February 2019 - CoSoSys releases Endpoint Protector 5.2.0.5. which brings Deep Packet Inspection for macOS users and other features to improve the user experience

March 2019 – CoSoSys won the Hot Company Data Loss Prevention InfoSec Award for 2019, organized by Cyber Defense Magazine

July 2019 - Endpoint Protector is Gold Winner at the Softshell Vendor Awards 2019. The Report shows how well a company and their products are positioned to meet the needs of the DACH market

November 2019 - CoSoSys is recognized by the Radicati Group in the 2019 Market Quadrant for Data Loss Prevention

December 2019 - CoSoSys releases Endpoint Protector 5.2.0.7. which brings Outside Hours and Outside Network Policies for the Content Aware Protection module and other features to improve the user experience

February 2020 - CoSoSys discontinues EasyLock, Endpoint Protector Basic, and My Endpoint Protector; Endpoint Protector is the Gold Winner in the Data Leakage Prevention category at the 2020 Cybersecurity Excellence Awards; CoSoSys is winner in the Data Loss Prevention section at the InfoSec Awards, organized by Cyber Defense Magazine
