**Endpoint Protector** – is an advanced, all-in-one Data Loss Prevention solution for Windows, macOS, and Linux, that puts an end to data leaks and data theft and offers seamless control of portable storage devices. Endpoint Protector’s filtering capabilities for data at rest and in motion range from file type to predefined content based on dictionaries, regular expressions, or data protection regulations such as GDPR, HIPAA, PCI DSS, CCPA, etc.

It features four specialized modules that can be mixed and matched based on client needs. The modules comprise Device Control, Content Aware Protection, Enforced Encryption, and eDiscovery. It makes work more convenient, secure, and enjoyable, offering an excellent ROI.

Endpoint Protector is a subscription-based DLP solution that offers a short learning curve and is easy to install and to manage, which is consistently ranked as the top solution for multi-OS enterprise organizations.

The solution is available as virtual and hardware appliance and as cloud services (Amazon Web Services - AWS, Microsoft Azure or Google Cloud Platform – GCP) and cloud-hosted. The product was recognized by Gartner in the February 2017 Magic Quadrant for Enterprise Data Loss Prevention and by the Radicati Group in the 2019, 2018, and 2017 Enterprise Data Loss Prevention Market Quadrant, and won several awards in the data protection industry.

Endpoint Protector is available directly to North American customers and distributes its products globally through partners and resellers.
